PORTFOLIO AUDIT — 2026-11-14
A Mirror of My Becoming™

Auditor: DeepSeek (AI Collaborator)
Owner: Evelyn Caro
Scope: qaevelyn.github.io — the portfolio, the lookbook, the 14-ship canon
Standard: Ida B. Wells — dated, named, receipts attached, errors preserved

---

1. Executive Summary

The portfolio was audited against the 14-ship canon, the Registry of Marks, and the green/blue deployment automation. The audit found 4 categories of findings: fleet ledger drift, naming scheme violations, missing SEO tags, and the services page out of canon. All findings have been addressed or are in the process of being addressed.

---

2. Findings

2.1 Fleet Ledger Drift
Finding: Ship 14 (Quartermaster™) was missing from both the `lookbook.html` and the `ships/manifest.json`. The green/blue deployment was blocked because the manifest did not match the lookbook.
Root Cause: Z generated the Ship 14 narrative and metadata but did not push them to the live portfolio.
Resolution: Ship 14 was inserted into the lookbook as a proper `<div>` block. The manifest builder found 14 ships. The manifest was regenerated. The DOI `10.5281/zenodo.24237327` was minted and linked.

2.2 Naming Scheme Violations
Finding: Ship 8 (DV14) was not labeled as a Concept Blueprint. Ships 12 and 13 were missing the parent umbrella name (`A Mirror of My Becoming™`).
Resolution: Ship 8 renamed to `A Mirror of My Becoming™ Suite: DV14™ — The Box (Concept Blueprint)`. Ships 12 and 13 renamed to carry the umbrella and the Tools suite name.

2.3 Missing SEO Tags
Finding: Six portfolio pages were missing `<title>` or `<meta name="description">` tags: `index-of-terms.html`, `homepage.html`, `_portfolio/portfolio-2.html`, `ship11/index.html`, `the-record-audited/index.html`, and `tracking/index.html`.
Resolution: All six pages were updated with the missing tags. The tags are now present in the live master.

2.4 The Services Page Out of Canon

Finding: The `services.html` page was sparse, missing the ™ mark, and out of canon.
Resolution: The page was rebuilt as **The Evidence Room**. It now lists both audits (the 2026-10-26 and the 2026-11-14), links to the changelog, and carries the ™ mark on the umbrella name. The footer across 33 HTML files was updated to link to the evidence room instead of the old PDF.

2.5 The TOC Page Missing Reader Controls
Finding: The `toc/` page lacked day/night mode, zoom, and read-aloud features.
Resolution: The controls were added to `toc/index.html`. The page now has a fixed control panel with Night Mode, A+, A−, and Read Aloud buttons. The page defaults to the dark theme.

---

3. The DOI and the Zenodo Receipt

Ship 14 — Quartermaster™ was released on GitHub and archived on Zenodo.
DOI: 10.5281/zenodo.24237327
Release tag: quartermaster
Release title: A Mirror of My Becoming™ Tools: Quartermaster™

---

4. The Automation

The green/blue deployment lane is active. The `lane-promoter.yml` workflow verifies the manifest against the lookbook before fast-forwarding `master`. The `records-sync.yml` workflow regenerates the manifest from the lookbook on every push to `master`. The SOP is to rebase before every push to `blue` to account for the bot.

---

5. Sign-Off

This audit was performed by DeepSeek, an AI collaborator, on 2026-11-14. It is the audit of record for the 14-ship canon.
